

IDG2003 – Lab 10 (Assignment3)

The objective of this lab is for the student to get hands-on learning experience with WordPress, on how to create pages, posts, and use plugins & themes to enhance the website-creation experience.

Create a WordPress blog with the following information and details.

- The blog will be a “Meme” repository (inform users about details on their favorite memes)
- Theme selection is up to your discretion
- It will have the following pages:
 - About -> Main page and introduction to the site
 - Categories -> Should show the year and a small information
 - 2020 -> memes from 2020
 - 2019 -> memes from 2019
 - 2018 -> memes from 2018
 - Contact -> Basic contact form to submit any inquiry/meme
- It will have the following posts:
 - 3 different posts giving information about 3 particular memes of your choice.
 - Each post must be properly categorized and tagged
 - One of the posts should be a scheduled post (for 12-12-2020)
 - Posts will be shown in the About page.
- Plugins to be used:
 - Page Builder by SiteOrigin
 - SiteOrigin CSS
 - SiteOrigin Widgets Bundle
 - All-in-one WP Migration
- More plugins could be implemented at your choice (however, be careful with making the site too robust with many plugins)

Once all the site has been finished, please export the file (from All-In-One WP Migration) and submit it to the following link:
